COBRA - The two-part clamping system in high-precision GDS quality!

Modern grinding processes become more and more complex, forcing you to achieve extreme precision and perfect quality while minimizing setup and tool-changing times, due to pricing pressure.

COBRA, the two-part clamping system, has been especially developed for high-performance grinding centers.

Excellent repeatability when changing blanks or collets is a key factor for optimal grinding results. Collets can be changed quickly and in just a few simple steps. You can also adjust radial concentricity in just a few minutes.

COBRA - the economical clamping system from GDS.

GDS - precision is our passion

An excellent solution at an affordable price.

Your advantages:

Tapered profile for optimal wheel clearance.

Good concentricity and repeatability.

Adjustable radial concentricity.

Handles a range of diameters using widely available Nann and Schaublin collets.

Very durable.
