

Concentricity gauge

and
accessories

good better BLUE

GDS[®]
Made in Germany

The **concentricity gauge**; user-friendly, individually applicable, prism support minimizes measurement errors.

Thanks to the rugged design, the concentricity tester can be used both in the measuring room and in the workshop.

It can be used both with several dial gauges and with electronic sensor probes.

The prismatic rests are made of round carbide rods. The special design of the stop enables the fast, precise adjustment of the workpiece center and only the exact center of the workpiece is touched by the ruby ball.

In conjunction with the friction wheel, the handwheel enables extremely slow lathing of the workpiece.

The contact pressure of the friction wheel can be adjusted with a sliding weight.

GDS - die Präzisionsmacher

The **concentricity gauge**; one base plate, five possible combinations.

INDIVIDUALLY

VARIED

INNOVATIVE

COMBINED

Concentricity tester with prism mounting

- Workpiece length 220 mm
- Workpiece diameter 32 mm

Art.Nr. 350090401

Measuring station for cone, concentric running and dimensional test

- Workpiece length 300 mm
- Workpiece diameter 50 mm

Art.Nr. 350090402

Concentricity tester with adjustable prism mounting

- Workpiece length 220 mm
- Workpiece diameter 32 mm

Art.Nr. 350090403

Measuring station for concentric running, roundness and uniform thickness test

- Workpiece length 300 mm
- Workpiece diameter 50 mm

Art.Nr. 350090404

Concentricity tester with tip mounting

- Tip width 180 mm
- Tip height 100 mm
- Workpiece weight max. 3 kg

Art.Nr. 350090405
